The autop range - The key for your success!

autop – inspiring lifting technology!

The autop lifts are electro-hydraulic single, twin or 4-ram inground lifts with capacities from 3 up to 6 t on a high level of quality.

Innovative solutions for applications in the check-in, repair, maintenance and body shop as well as for test, MOT and wheel alignment.

Especially our very complete program of swivel arm lifts offers a professional lifting of the complete range of vehicles of the car manufacturers.

The advanced quality of the autop lifts is clearly visible on the products:

- Constructed and manufactured corresponding to EN 1493
- Innovative superstructures
- Alarm system
- Bearing/guiding elements made out of special alloy
- Cylinders hard chromed 30 µ
- Flexible synchronization / safety device
- Quality galvanizing
- Aggregate with suboil motor optional with ecological oil
- Company certified DIN EN ISO 9001:2008

autop focusses on the inground concept. There is no other lifting concept with the same advantages: Optimized and space-saving workstations with free access all-around the vehicle giving a clean and high quality impression for the whole workshop. Outstanding quality level with a long lifetime.

autop also grants a warranty of 5 years after date of dispatch on the high pressure seal, on the bearing and on the synchronization device.
