

# Always on the top!

## autop Sololift 1.35 Pv 120-180, 140-200, 160-220

This platform has a very low drive-over height and a sturdy construction. Due to its comfortable length adjustment you can reach nearly every lifting point of a private car.

Handy rubber blocs are used for a correct lifting at the recommended lifting points.

The non-sliding surface of the superstructure together with the rubber blocs assure a safe lifting.
